Brittany Chiang

Lead Engineer at Upstatement

I build accessible, inclusive products and digital experiences for the web.

🐙 📷 🐦 in

Back in 2012, I decided to try my hand at creating custom Tumblr themes and tumbled head first into the rabbit hole of coding and web development. Fast-forward to today, and I've had the privilege of building software for an advertising agency, a start-up, a student-led design studio, and a huge corporation.

My main focus these days is building products and leading projects for our clients at Upstatement. In my free time I've also released an Upstatement that covers everything you need to know to build a web app with the Spotify API.

When I'm not at the computer, I'm usually rock climbing, hanging out with my wife and two cats, or running around Hyrule searching for Korok seeds.

2018 — PRESENT

Upstatement ↗
Senior Engineer

Deliver high-quality, robust production code for a diverse array of projects for clients including Harvard Business School, Everytown for Gun Safety, Pratt Institute, Koala Health, Vanderbilt University, The 19th News, and more. Provide leadership within engineering department through close collaboration, knowledge shares, and mentorship.
